Pakistan's 1st

Halal Industrial Zone

FIEDMC has launched Pakistan's first Halal Industrial Park inside M-3 Industrial City. Halal industry is a fast emerging business in the world, attracting both Muslims and non Muslims, especially non Muslims due to realising the importance of halal food. As experts have opined that they are safer, hygienic, nutritious, having high quality and reliability. Halal food is consumed not only by 1.5 billion Muslims around the world, but also by at least 500 million non-Muslims, which shows that there is a big scope to enter in the halal food industry, to tap the world market.

Food & Vegetable Zone

Pakistan has an agro-based economy that is heavily dependent on the natural abundance of its agricultural products. The government has recognized the importance of agriculture to the economy and has taken several initiatives to further enhance the productivity of this sector. The continuous upgrading of the production facilities and technology through import of agricultural machinery and food equipment has allowed the food and vegetable sector to meet the growing demands of the domestic and international market. M-3 Industrial City provides all the necessary infrastructure and assistance for our clients to maximize their returns on investment in this sector.

Halal Meat Zone

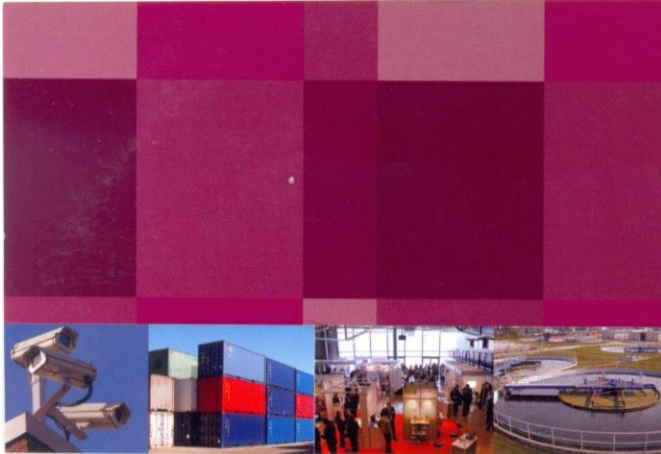

The halal meat industry has enormous potential in Pakistan due to high local and foreign demand. Specializing in exporting free range grass fed beef and mutton throughout the Middle East, the sector enjoys the distinction of being one of the leading meat exporters to UAE, Kuwait, Oman and Muscat. M-3 City is dedicated to develop a plant that would deliver to the international expectations of the investors.

Halal Cosmetics Zone

Entrepreneurs producing ,halal,, cosmetics now have a booming global demand as more Muslims opt for beauty products that conform to Islamic rules. Pakistan is emerging as a leading halal cosmetics manufacturing market across the world by meeting the international standards of Halal-HACCP (Hazard Analysis and Critical Control Points). M-3 Industrial City provides adequate infrastructure for the entrepreneurs to produce halal cosmetics in this up and coming sector of the global market.

Beverages & Dairy Products Zone

Pakistan is one of the largest milk producers of the world, and with the advancement of technology and infrastructure, producers are beginning to capitalize on the potential of this market. With increasing production in the beverages sector, M-3 Industrial City provides its investors the platform to make the most out of their investment.

M3 Industrial City
